i-smart Care 10

Blood Gas Analyzers

Overview

Portable blood gas analyzer providing accurate results for small sample volumes using micro sensor technology.

Product Description

The i-SmartCare 10 is a state-of-the-art electrolyte and blood gas analyzer designed for critical care environments. It offers a comprehensive 23-parameter menu to provide immediate clinical insights from a single, small whole blood sample. The system utilizes advanced sensor technology to ensure laboratory-grade accuracy at the point of care. Its compact, portable design makes it an essential tool for emergency rooms, ICUs, and operating theaters.

Key Features

- ? 50-second analysis
- ? All-in-one cartridge
- ? 100 µL sample volume
- ? Micro sensor tech
- ? Built-in scanner
- ? Built-in printer
- ? 2-hour battery life
- ? HIS/LIS/EMR connection

? Automated calibration

? Retractable probe
